

The model file is now provided in both .OTX and .ETX formats to avoid the need for conversion.

Choose the format according to your operating system as follows:

Operating system	Model file
OpenTX (all versions)	.OTX
EdgeTX (up to 2.10)	
EdgeTX (2.11 or higher)	.ETX

Please also make sure that your OS version is supported by the template (supported versions are shown in the template download page).
